TH PLANTATIONS REPORTS 3QFY2019 FINANCIAL RESULTS

Kuala Lumpur, 26 November 2019 – TH Plantations Berhad (“THP” or “the Group”) announced its third Quarter (3QFY2019) financial results for the year ending 2019 today, reporting a net loss of RM40.01 million, against a net loss of RM22.52 million in the same period last year. The loss was attributable to the impairment for plantation assets identified for divestment this year and finance cost incurred by the Group, amounting to RM53.88 million and RM20.04 million respectively. Revenue for the third quarter stood at RM136.00 million a decline of 3% compared to last year.

The Group’s Fresh Fruit Bunches (FFB) production and process for the period grew by 4% and 2% respectively, while its Crude Palm Oil (CPO) output and sales increase by 3% and 11% concurrently against the same period last year. The Group showed an increment in its Palm Kernel (PK) output and sales by 10% and 18% respectively against the same quarter last year.

However average selling price for FFB, CPO and PK remains low during this quarter at RM346 per metric ton, RM 1,916 per metric ton and RM1,105 per metric ton respectively. Despite a higher production and sales, the revenue remains low mainly due to lower average prices.

The Company clarified, at operational level, the Group continues to perform better. The Group would have reported a net profit of RM447,000.00 if not for the impairment cost of RM53.88 million. The Group’s assets rationalisation programme is on course which will enable the group to show a better financial position.

THP shall benefit from the improving CPO prices largely due to the global concern on lower supply of CPO arising from adverse 2019 weather in Indonesia, poor input of fertilizer and demand in the enforcement of higher biodiesel mandates in Indonesia & Malaysia.
